Reference Volume XIII
ELECTRONIC MAGNIFIERS

Task Vision™ Digital One

- Portable Pocket 4” x 3” 6.5 oz
- Hand held or stand (legs fold in)
- 3.5” LCD Screen with brightness levels
- 3X to 15X Enlarge, Reduce or Freeze Image
- Full Color, positive/negative, bold positive/negative, blue/yellow, yellow/blue, blue/black
- Connects to any TV or Monitor 4-6 hours of work time

Includes: Lithium ion rechargeable battery, charger, adapter, AV cable and travel case.

Task Vision™ Digital Two

- Portable 6.25” x 3.25” 10 oz
- 4.3” LCD screen with brightness levels
- 3x to 18x up to 75x TV/Computer Monitor
- Full color, positive/negative, blue/white, black/yellow, blue/yellow, black/green
- Enlarge, reduce or freeze images
- Connects to any TV or Monitor 4-6 hours of work time

Includes: Lithium ion rechargeable battery, charger, adapter, AV cable and travel case.

Task Vision™ Digital Five

- Portable Pocket with stand 4.5” x 3” x .5” 3.5 oz
- 3.5” LCD screen with LED light and brightness levels
- 2x to 15x, Enlarge, reduce and freeze images
- Full color, black and white, high contrast, positive/negative
- 4-7 hours of work time

Includes: Lithium ion rechargeable battery, charger, adapter and USB plugs.

Task Vision™ Digital Seven

- Portable with folding handle and stand 5” x 3” 7 oz
- 3.5” LCD screen with brightness levels
- 2x to 16x - Enlarge, reduce or freeze images
- Full color, gray/black/white, white/black, blue/white, yellow/black, yellow/blue, blue/yellow
- Connect to TV or computer monitor; 6-8 hours of work time

Includes: Lithium ion rechargeable battery, charger, adapter, AV and USB cables and travel case.

Task Vision™ Digital Mouse

- Connect to any TV or Monitor
- 20x zoom up to 70x digitally (WM1 & WM2)
- Full color, High contract positive and negative and freeze images

#WM1 - Wireless mouse w/receiver  
#WM2 - Wired mouse  
#WM3 - Wireless USB 2x to 32x

Optelec Compact Mini

- 2x - 11x
- 3.5” LCD Screen
- Color, Gray scale, and Freeze Image
- 4.7 oz

#MINI

Optelec Compact Plus

- 5x, 7x, and 8x
- 4.3” LCD Screen
- Color, Black/White, Blue/Yellow, Reverse and Freeze Image
- 10 oz.

LOUPES: TELESCOPES WATER-PROOF / LED HEADLIGHTS

Task Vision™ Waterproof Lana Loupe

- Platinum Frame
  - #PLW2.5X
  - #PLW3.5X
- *Includes side shields
- *Rx-able

- All new loupes are dust-resistant and waterproof to ensure ease of cleaning/disinfecting, and years of trouble-free use.
- High resolution clarity for the ultimate vision experience.
- Great depth of field comfortably extends the natural accommodation capability of the human eye.
- Flip-Up function means if you do not need the loupes temporarily, just flip it up; no need to take it off.
- Adjustable nose bridge accommodates to any pupil distance and allow the user to set your intrapupillary.
- Fully adjustable viewing angle allows convergence and declination angle for perfect optical alignment.

Near Monocular Focus 12" Binocularity to Infinity

**Task Vision™ 2.8x Sport Glasses/Binocular**

**Task Vision™ 3.5x Sport Glasses**
Focusable to 24" Binoculary 16" Monocular

**Task Vision™ Professional Adjustable and Reversible Prism Glasses**
- Unique frame design allows the user to adjust the prisms up/down or reverse the prisms.
- The lenses on these glasses are actually prisms that change the normal line of sight without distortion.

Can be used for watching TV, reading and so much more because of the adjustable and reversible feature.

**Task Vision™ Bed Prism Glasses**
- Lie flat in bed and watch TV or read.
- Prisms change your line of sight 90 degrees without distortion.
- Ideal for people who must lie flat on their back for long periods of time.
- Reduces neck and back strain.
- Worn like glasses.
- Can be worn over your prescription glasses.
- Can be used for MRI - non ferrous metal - The screws and hinges are made of brass, which has no interference with MRI.

SPECTACLES PRISMATIC by TASK-VISION™

Task Vision™ Prismatic Spectacles - Custom made by Tech Optics

Spherical Lenses CR-39 (Not Molded) with scratch resistant coating

High Index 1.60 index with two-sided scratch resistant coating

HOW MAGNIFIERS WORK WITH ASPHERIC LENSES

HOW TASK-VISION™ PRISM SPECS USE SPHERICAL LENSES

Eyes converge, then view magnified image

Having a patient strap a magnifying glass to their head is a ridiculous notion. If they are wearing thin aspheric prismatic spectacles, that is exactly what they are doing.

Spherical lenses have fixed magnification, or power, throughout the lens. Wherever a patient looks through the lens, the power is the same. This allows them to scan reading material efficiently.

Aspheric lenses have variable magnification. Outside the optical center, the power must be distorted in order to reduce thickness. This is desirable for many applications, but not for prismatic spectacles. As the eyes scan, this variable magnification is especially disruptive, because one eye views through reduced magnification while the other views through increased magnification.

Aspheric prismatic are typically made from molded acrylic polymer. Acrylic is not optical quality. For this reason, acrylic lenses are not used in prescriptive optics. Acrylic lenses are thermally unstable. If an acrylic prismatic is left on the dash of a car on a hot day, it will permanently change power.

Not all prismatic spectacles are created equal. Demand optical quality in your prismatic spectacles. Task-Vision™ prismatic spectacles use optical quality CR-39 spherical lenses - Not Molded!

Spectacles custom made by Tech Optics
**Peli Press-On Prism**

Revolutionary device for patients with Hemianopsia. The stick and clip-on are great for in-office screening. Peli press-on prisms are available in (4 pair bulk pack or 1 pair pack) as an alternative to permanent lenses or for patient to test before ordering permanent lenses. Economically affordable. Fitting instructions are available.

- **Peli Demo Stick Prism**
  - #PELISCRN

- **Peli Demo Clip Prism**
  - Base Left - #PELICLIPL
  - Base Right - #PELICLIPR

**Hemianopic Readers**

**Hemi Reader Demo Clip**

10° yoked prisms shift print away from the blind side into the seeing side for ease of reading. Available for both right or left Hemianopsia. For in-office demonstration.

- Prism Base Left - #HRCBL
- Prism Base Right - #HRCBR

### Post-operative Functional Limitations in Patients with Benign Essential Blepharospasm

- **Dermatology**: Diabetic Retinopathy, Cataract, Achromatopsia
- **Glaucology**: Glaucoma
- **Contrast Sensitivity**: Contrast Sensitivity
- **Glare**: Glare
- **Cataract**: Pre-operative

### FL-41 Filter

- Blocks specific light wavelengths that have been found to cause headaches and fluorescent light induced migraines.
- FL-41 has also been identified as helpful for Blepharospasm, Severe Dry Eye Syndrome, and Photophobia.

### FL-41 Clip

- Improves blink frequency, light sensitivity, and functional limitations in patients with Benign Essential Blepharospasm.

## UV Shields (Standard products with UV protection)

### Filter # / Visible Light

- **#10** - 90% Clear - Full UV protection, no reduction in visibility.
- **#20** - 58% Light Grey - Relieves indoor glare and helpful under fluorescent lighting.
- **#21** - 32% Medium Gray - Soothing color sharpens focus and excellent glare protection.
- **#22** - 13% Dark Grey - Extremely comfortable color and cuts glare and sharpens focus with natural color rendition.
- **#23** - 4% Dark Grey - Comfortable color for extreme light sensitivity, cuts glare, and has natural color rendition.
- **#26** - 30% Blue - Relief for Achromatopsia.
- **#30** - 7% Grey-Green - Glare protection with a low visible light transmission.
- **#33** - 4% Dark Grey-Green - Glare protection for the extremely light-sensitive.
- **#38** - 58% Light Grey-Green - Glare protection with natural color rendition.
- **#40** - 16% Amber - All purpose sunglass, heightens contrast, relieves glare, and has Blue Blocker Protection.
- **#43** - 4% Dark Amber - Heightens contrast and relieves glare for the light-sensitive.
- **#48** - 53% Light Amber - Heightens contrast for indoor use.
- **#50** - 54% Yellow - Heightens contrast, provides maximum brightness, enhances visual acuity, and Blue Blocker Protection.
- **#53** - 4% Dark Yellow - Combines contrast enhancement with glare reduction for enhanced visual acuity and has Blue Blocker Protection.
- **#58** - 65% Light Yellow - Heightens contrast, provides maximum brightness, and enhances visual acuity.
- **#60** - 49% Orange - Intensifies backgrounds for enhanced visual acuity and increased contrast, helpful for reading, and has Blue Blocker Protection.
- **#63** - 4% Dark Orange - Intensifies backgrounds for enhanced visual acuity and increased contrast, Blue Blocker Protection.
- **#68** - 52% Light Orange - Intensifies backgrounds for enhanced visual acuity and increased contrast, helpful for reading, and has Blue Blocker Protection.
- **#80** - 4% Plum - Contrast enhancement and glare relief for the light-sensitive and approved filter for PDT.
- **#81** - 20% Plum - General purpose filter, glare reduction for enhanced visual acuity, and Blue Blocker Protection.
- **#88** - 40% Light Plum - Good contrast, realistic color rendition and excellent indoor filter.
- **#90** - 45% Medium Red - For rod monochromats and achromats and relieves blur caused by blues, greens and yellows.
- **#93** - 4% Red - For rod monochromats and achromats and relieves blur caused by blues, greens and yellows.
- **#98** - 59% Light Red - For rod monochromats and achromats and relieves blur caused by blues, greens and yellows.
- **#47** - 40% Topaz - All purpose sunglass, enhances contrast and provides glare reduction with natural colors.
- **#32** - 10% Grey-Green - Comfortable color, cuts glare and sharpens focus with natural color rendition.
- **#42P** - 21% Grey Polarizer - Glare relief in a natural color, available in SpectraShields only.
- **#44P** - 26% Amber Polarizer - Glare relief in a natural color, available in SpectraShields only.
- **#75** - 47% Red/Orange - Contrast enhancement and glare relief for retinal disease patients and has Blue Blocker Protection.
- **#70** - 44% Pink - For rod excitement.
- **#28** - 58% Light Grey - Relieves indoor glare and helpful under fluorescent lighting.

## Glare Shield (Products have UV protection and are specifically designed to reduce glare.)

### Filter # / Visible Light

- **#465** - 70% Yellow - Heightens contrast, provides maximum brightness, enhances visual acuity and Blue Blocker Protection.
- **#505** - 56% Orange - Intensifies backgrounds for enhanced visual acuity and increased contrast, helpful for reading, and has Blue Blocker Protection.
- **#533** - 35% Amber/Orange - Contrast enhancement, glare relief and Blue Blocker Protection.
- **#553** - 52% Red/Orange - Contrast enhancement, glare relief and Blue Blocker Protection.
- **#570** - 39% Dark Red/Orange - Contrast enhancement, glare relief for retinal disease patients and Blue Blocker Protection.

## UV and IR Protection (Heat relief)

- **#11** - 40% Light Amber - Helpful on hazy, overcast days, relieves sensitivity to indoor lighting and has Blue Blocker Protection.

Task Vision™ “RELIEF TINT” Computer Clip-On Reading Glasses

Can be attached to your prescription glasses. When you work at a computer for any length of time, it’s common to experience eye strain, blurred vision known as Computer Vision Syndrome (CVS). This is because the visual demands of computer work are unlike those associated with most other activities.

- UV Protection
- Clip-on / Flip-up onto your prescription eyeglasses
- Aspheric Lens – Distortion Free
- Anti Reflective coating
- Hard coated / Scratch Resistant
- 21 grams – Extremely light and comfortable

Principal benefits of “Relief Tint” Computer Clip-On Reading Glasses:

- Efficient protection for the eye
- Enhanced, true color perception
- Increased contrast and sharper detail
- Reduces eyestrain and relaxes your eyes
